

## The Norwegian “green” house.

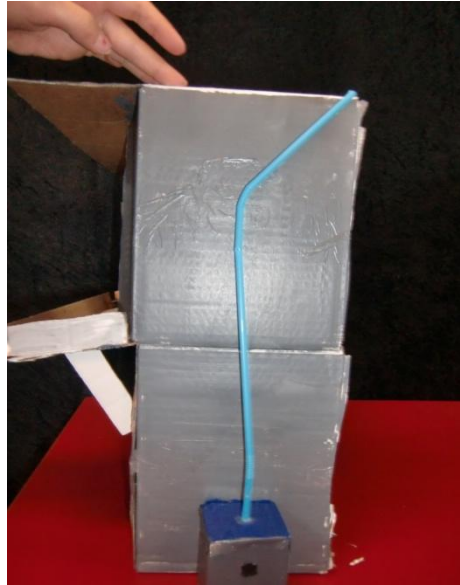

- Put one cardboard box on top of another.
- Paint the house grey, and the roof white.
- Make a big window upstairs. Use a transparency film as glass in.
- Then you make a terrace outside the big window.
- Make a staircase from folded cardboard.
- Put insulation in the roof.

- Divide the ground floor in two rooms with a wall made of cardboard. This will be the bedroom and the bathroom.
- Put a bed in the right corner of the bedroom.
- Put one water saving shower in the bathroom.
- Put in tapestry on the floor in the bathroom, ca: 4.4 cm.
- First floor: The kitchen is to the right and the living room to the left.
- Put a recycle bin in the kitchen. The recycle bin is divided into three compartments: plastic, paper and food.
- Put a black stove and a light blue refrigerator in the kitchen.

- Make a rainwater harvesting system:
  - Draw a grid on the roof.
  - Put a little box (water chamber) on one of the short sides.
  - Put ta straw from the roof to the top of the box.
  - Paint the top of the box blue.

- Use aluminum foil to make a sun collector on the other side of the house.
